

Question 21 - 26: dạng MCQ**Cách làm:**

- Đọc kỹ các câu hỏi và đáp án. Trong 3 đáp án sẽ có 1 đáp án đúng (True), 2 đáp án còn lại cũng được đề cập đến trong bài nhưng sẽ ở dạng False hoặc Not given
- Nghe và lựa chọn đáp án đúng

21 What **problem** did both **Diana** and **Tim** have when arranging their work experience?

A **making initial contact** with **suitable farms**

=> Đáp án đúng là **A**

DIANA: I was lucky, the farmer let me stay on the farm so I didn't have to travel. But **finding the right sort of farm** to apply to **wasn't easy**.

TIM: **No, they don't seem to have websites, do they. I found mine through a friend of my mother's, but it wasn't easy.**

B organising **transport** to and from the farm

Trong bài có đề cập đến khó khăn liên quan tới việc di chuyển tuy nhiên đây là vấn đề của TIM, không phải vấn đề của cả 2.

=> Đáp án B là **FALSE**

TIM: One problem was it was **miles away** and **I don't drive**

DIANA: **I was lucky, the farmer let me stay on the farm so I didn't have to travel.** But finding the right sort of farm to apply to wasn't easy.

C finding **a placement** for **the required length of time**

Tương tự câu B, vấn đề TIM trang trại với thời gian được yêu cầu được đề cập nhưng chỉ là vấn đề của riêng TIM, không phải vấn đề của cả hai như đề bài yêu cầu.

=> Đáp án C là **FALSE**

TIM: And also, I'd really wanted a **placement for a month**, but **I could only get one for two weeks**.

DIANA: **I was lucky, the farmer let me stay on the farm so I didn't have to travel.** But finding the right sort of farm to apply to wasn't easy.

22 **Tim** was **pleased** to be able **to help**

B **a sheep** that was **having difficulty giving birth**.

=> Đáp án **B**

TIM: My farm was mostly livestock, especially sheep. I really **enjoyed helping** out with them. I was up most of one night helping **a sheep deliver a lamb** ...

Ở đây, việc gặp khó khăn trong việc sinh (having difficulty giving birth) được paraphrase lại là không dễ dàng (wasn't a straightforward birth) (straightforward là từ đồng nghĩa với easy)

A a lamb that had **a broken leg**.

Bài nghe có đề cập tới một con cừu con bị gãy chân nhưng không phải do Tim giúp mà là do bác sĩ thú y.

=> Đáp án A là **FALSE**

C a newly born lamb that was **having trouble feeding**.

Trong bài, con cừu mới sinh có thể bú gần như ngay lập tức chứ không gặp vấn đề gì cả.

=> Đáp án C là **FALSE**

23 Diana says the **sheep** on her farm

B were mainly reared for **their meat**.

Giải thích tí chỗ này,
Tuy không nói trực tiếp, nhưng Diana xác định thông tin này cung cấp dưới dạng câu hỏi của Tim nên xem như chính Diana nói điều này.

=> Đáp án là **B**

A were of various different varieties.

Ở đây có hai thông tin cần quan tâm: trước khi Diana làm việc ở nông trại và trong quá trình Diana làm việc ở nông trại. Khi Diana làm việc thì nông trại chỉ có một loài là "Suffolks". Thông tin trước khi Diana vào làm

TIM: No, the farmer was there, and he told me what to do. **It wasn't a straightforward birth**, but I managed. It was a great feeling to see the lamb stagger to its feet and start feeding almost straight away, and to know that it was OK.

TIM: Then another time a **lamb had broken its leg**, and **they got the vet in to set it**, and he talked me through what he was doing. That was really useful.

TIM: No, the farmer was there, and he told me what to do. It wasn't a straightforward birth, but I managed. It was a great feeling to see **the lamb** stagger to its feet and start **feeding almost straight away**, and to know that it was OK.

DIANA: Yes, my farm had sheep too. The farm was in a valley and they had a lowland breed called Suffolks, although the farmer said they'd had other breeds in the past.

TIM: So were **they bred** for **their meat**?

DIANA: **Mostly, yes**. They're quite big and solid.

DIANA: Yes, my farm had sheep too. The farm was in a valley and they **had a** lowland breed called Suffolks, although the farmer said they'd **had other breeds in the past**.

việc có nhiều loại “they’d had other breeds in the past”
có thể đánh lừa thí sinh.

=> Đáp án A là **FALSE**

C had **better quality wool** than **sheep on the hills**.

Sheep ở đây là sheep của TIM không phải của DIANA
nên đang mâu thuẫn với đề bài. Hơn nữa, Sheep ở
đây đúng là có chất lượng tốt (sought after,
hardwearing) nhưng không có sự so sánh với Sheep
trên đồi.

=> Đáp án C là **NOT GIVEN**

TIM: My farm was **up in the hills** and they **had** a
different breed of **sheep**, they were
Cheviots.

DIANA: Oh, I heard their wool’s **really sought after**.

TIM: Yes. It’s very hardwearing and they use it for
carpets.

24 What did **the students** learn about **adding supplements** to **chicken feed**?

A **These** should only **be given** **if specially needed**.

Trong bài Diana nói rằng gà chỉ cần uống các thực
phẩm chức năng ở các thời điểm (at times) khi gà thực
sự cần chúng (particularly require) tương ứng với cụm
từ khi đặc biệt cần (specially needed) của đáp án

=> Đáp án là **A**

TIM: I was interested in **the amount of supplements**
they add to animals’ feed nowadays. Like, even the
chickens got **extra vitamins and electrolytes** in **their**
feed.

DIANA: Yes, I found that too. And they’re not cheap.
But my farmer said some are overpriced for what they
are. And he didn’t **give them** as a matter of routine, just
at times when the **chicken** seemed to **particularly**
require them.

TIM: Yes, mine said the same...

B It is **worth paying extra** for the **most effective**
ones.

Trong bài, TIM khẳng định các loại thực phẩm chức
năng đắt hay rẻ đều như nhau vì vậy thông tin loại đắt
sẽ hiệu quả hơn là sai.

=> Đáp án B là **FALSE**

TIM: Yes, mine said the same. He said certain breeds
of chickens might need more supplements than the
others, but **the cheap and expensive ones are all**
basically the same.

C The amount given at one time should be limited.

Thông tin này hoàn toàn không được nhắc đến trong bài.

=> Đáp án C là **NOT GIVEN**

25 What happened when **DIANA** was working with **dairy cows**?

C She **made a mistake** when **storing milk**.

=> Đáp án là **C**

DIANA: Yes, **dairy cows**. I made a really embarrassing **mistake** when I was **working in the milk shed**. Some cows had been treated with antibiotics, so their milk wasn't suitable for human consumption, and it **had to be put in a separate container**. But I **got mixed up**, and I poured some milk from the wrong cow in with the milk for humans, so the whole lot had to be thrown away. The farmer wasn't too happy with me.

A She **identified** some cows **incorrectly**.

Ở đây, DIANA nhầm các loại sữa với nhau chứ không phải nhầm các loại bò nên thông tin này là không chính xác.

=> Đáp án A là **FALSE**

DIANA: Yes, dairy cows. I made a really embarrassing mistake when I was working in the milk shed. Some cows had been treated with antibiotics, so their milk wasn't suitable for human consumption, and it had to be put in a separate container. But I **got mixed up**, and I **poured some milk from the wrong cow in with the milk for humans**, so the whole lot had to be thrown away. The farmer wasn't too happy with me.

B She accidentally **threw some milk away**.

Lỗi của DIANA là vô tình trộn nhầm các loại sữa với nhau nên mới phải đổ sữa đi vì vậy đáp án B không chính xác.

=> Đáp án B là **FALSE**

DIANA: Yes, dairy cows. I made a really embarrassing mistake when I was working in the milk shed. Some cows had been treated with antibiotics, so their milk wasn't suitable for human consumption, and it had to be put in a separate container. **But I got mixed up, and I poured some milk from the wrong cow in with the milk for humans**, so the whole lot had to be **thrown away**. The farmer wasn't too happy with me.

26 What did **both farmers** mention about **vets** and farming?

C **Some jobs** **could be done** by the farmer rather than by a **vet**.

TIM: I asked my farmer how much he depended on **the vet** to deal with health

Thông tin của đáp án C được TIM nhắc đến và DIANA cũng đồng tình.

=> Đáp án là **C**

A Vets are failing to cope with some aspects of animal health.

Trong bài có đề cập tới thông tin về những gì bác sĩ thú ý có thể làm như là phẫu thuật (minor operations) nên nói bác sĩ thú ý không thể làm một số điều là sai.

=> Đáp án A là **FALSE**

B There needs to be a fundamental change in the training of vets.

Thông tin không được đề cập trong bài.

=> Đáp án B là **NOT GIVEN**

problems. I'd read reports that the livestock's health is being affected as farmers are under pressure to increase production. Well, he didn't agree with that, but he said that actually some of the stuff the vets do, like minor operations, he'd be quite capable of doing himself.

DIANA: Yeah. My farmer said the same. But he reckons vets' skills are still needed.

TIM: I asked my farmer how much he depended on the vet to deal with health problems. I'd read reports that the livestock's health is being affected as farmers are under pressure to increase production. Well, he didn't agree with that, but he said that actually some of the stuff the vets do, like minor operations, he'd be quite capable of doing himself.

DIANA: Yeah. My farmer said the same. But he reckons vets' skills are still needed.

TIM: I asked my farmer how much he depended on the vet to deal with health problems. I'd read reports that the livestock's health is being affected as farmers are under pressure to increase production. Well, he didn't agree with that, but he said that actually some of the stuff the vets do, like minor operations, he'd be quite capable of doing himself.

DIANA: Yeah. My farmer said the same. But he reckons vets' skills are still needed.

Question 27- 30: Matching

Cách làm:

- Đọc lướt qua câu hỏi (các câu hỏi sẽ không bị paraphrase nên không cần lo lắng là không nhận ra chúng trong audio)
- Đọc kỹ các phương án lựa chọn, đảm bảo rằng đã hiểu và phân biệt được sự giống-khác nhau giữa chúng
- Nghe kỹ Audio và chọn đáp án

<p>27 - 30 What opinion do the students give about each of the following modules on their veterinary science course?</p> <p>27 Medical terminology</p> <p>=> Đáp án đúng là A: Tim found this easier than expected.</p>	<p>DIANA: Now we've got to give a bit of feedback about last term's modules – just short comments, apparently. Shall we do that now?</p> <p>TIM: OK. So medical terminology.</p> <p>DIANA: Well, my heart sank when I saw that, especially right at the beginning of the course. And I did struggle with it.</p> <p>TIM: I'd thought it'd be hard, but actually I found it all quite straightforward.</p>
<p>28 Diet and Nutrition</p> <p>=> Đáp án đúng là E: Tim was shocked at something he learned on this module.</p>	<p>TIM: What did you think about diet and nutrition?</p> <p>DIANA: OK, I suppose.</p> <p>TIM: Do you remember what they told us about pet food and the fact that there's such limited checking into whether or not it's contaminated? I mean in comparison with the checks on food for humans – I thought that was terrible.</p>
<p>29 Animal disease</p> <p>=> Đáp án đúng là F: They were both surprised how little is known about some aspects of this.</p>	<p>DIANA: Mm. I think the module that really impressed me was the animal disease one, when we looked at domesticated animals in different parts of the world, like camels and water buffalo and alpaca. The economies of so many countries depend on these, but scientists don't know much about the diseases that affect them.</p> <p>TIM: Yes, I thought they'd know a lot about ways of controlling and eradicating those diseases, but that's not the case at all.</p>
<p>30 Wildlife medication</p>	<p>TIM: I loved the wildlife medication unit. Things like helping birds that have been caught in oil spills. That's</p>

=> Đáp án đúng là **C**: Diana **may do some further study**
on this.

something I hadn't thought about before.

DIANA: Yeah, I thought I **might write my dissertation** **on**
something connected with that.
